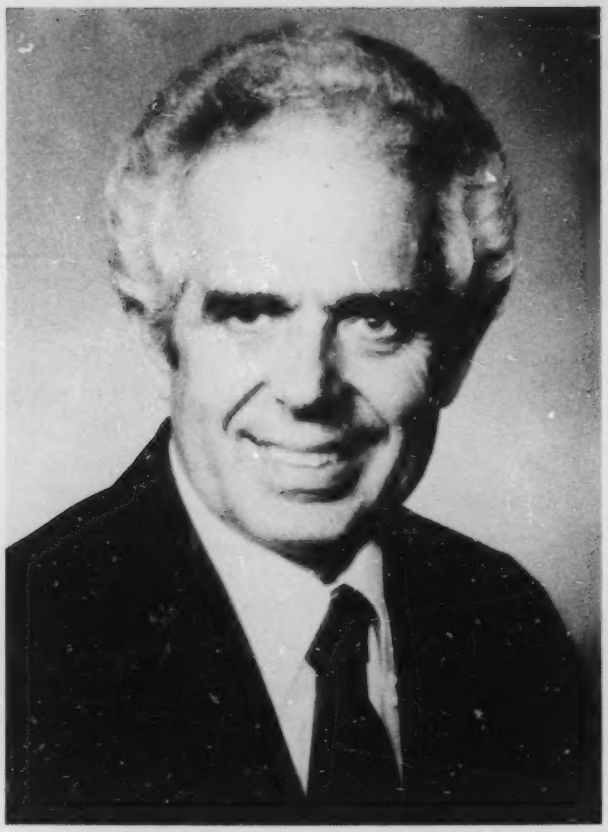
A Message from the Commissioner



Agriculture continues to contribute a significant portion of Alabama's economy. Approximately 25 percent of the state's work force is employed in agricultural related jobs.

Reliable information is essential to making wise decisions, ensuring continued growth for agriculture and, in the end, helping the state's economy to remain strong. Within the pages of this Alabama Agricultural Statistics bulletin, you will find a comprehensive summary of current data relating to the agricultural sector of Alabama's economy.

Alabama can be proud of its farm community for being the state's leading industry, but also for supplying the food and fiber for our growing demands and those of the world as well. And, through the assistance of our farm community, the compilation of this bulletin has been made possible.

The 1984 Alabama Agricultural Statistics bulletin is the work of the Alabama Crop and Livestock Reporting Service. This Service represents one of many ways in which the Alabama Department of Agriculture and Industries cooperates with the U. S. Department of Agriculture to avoid costly duplication of effort.

FOREWORD

Over the years, this bulletin has been among the most popular of our publications based on user demand. This edition of Alabama Agricultural Statistics is number twenty-six in a series begun in 1948.

This edition contains by far the most complete accumulation of statistical data on Alabama agriculture currently available. In general, it contains the preliminary data series of state and county estimates for 1983 and comparable data for 1982.

The estimates presented in this bulletin are developed primarily from sample surveys. In recent years we have come to rely heavily on a program of probability sampling, enumerative surveys, and objective yield measurements to support our mail survey system. This multiple survey system has been used to increase the accuracy of our estimates.

The accuracy of our estimates is also closely related to the degree of survey response. We are especially appreciative of the excellent cooperation we have received from Alabama farmers and agribusinessmen. Be assured we have kept our pledge of confidentiality on the reported data.

Reports from farmers have also been supplemented by information from the Alabama Cooperative Extension Service. We rely heavily on their contributions for the weekly crop weather report and for county level cash farm income estimates.

The staff of the Alabama Crop and Livestock Reporting Service should be commended for their continued efforts in data collection and analysis to provide quality information for the State of Alabama.

CROPS REVIEW

1983

Joyce B. McIntyre

Acres harvested for corn, cotton, sorghum, soybeans, and wheat showed a decrease from 1982, while peanuts increased slightly. Alabama farmers harvested their crops from 3.44 million acres, compared with 4.34 in 1982.

Land preparation and planting were hampered because of wet fields and rainy weather during February, March, and April. Corn, cotton, peanuts, and sorghum plantings lagged behind the previous year and the average. May brought a break in the weather and planting progressed rapidly; however, field progress remained behind normal. Soybean planting was underway by May 9.

Wheat harvest began in late May and planting of corn, cotton, and peanuts was virtually complete. By early June the southern part of the state was in need of rain. Crop development lagged behind normal by mid-June. Scattered showers late in the month improved soil moisture conditions in the southern part of the state.

July brought hot and dry conditions with crops in fair to good condition. Wheat harvest was virtually complete by mid-July. Soil moisture was rated very short to short throughout the month of August with most crops in fair condition.

Sorghum harvest was underway by late August and south Alabama reported peanuts dug. September brought some relief from the dry conditions with showers reported in most areas. Field activities continued with little interruption.

Crop conditions were rated mostly fair with developmental stages behind normal during September. Peanut harvest was underway by mid-September with cotton harvest starting in late September. Rain during the last week in September brought soil moisture to adequate for the first time since mid-July. Soybean harvest began in early October. Corn, cotton, peanuts, soybeans, and sorghum harvest progressed near normal with corn and peanuts virtually complete by late October. Ideal harvest conditions existed through early November. Wheat acreage seeded was behind normal because of the dry conditions. Cotton and sorghum harvest advanced to near completion by mid-November. Rain in late November aided development of fall-seeded crops. Wet weather continued through the end of the year. Soybean harvest was virtually complete by mid-December.

FIVE LEADING CROPS: ACREAGE, YIELD, PRODUCTION, AND VALUE, 1983

CROP	UNIT	ACRES HARVESTED	YIELD PER HARVESTED ACRE	PRODUCTION	VALUE OF PRODUCTION
		1,000 Acres	Unit	1,000 Units	1,000 Dollars
Corn	Bu.	305	59	17,995	63,882
Cotton lint 1/	Lb.	215	409	183	57,711 2/
Hay	Ton	650	1.60	1,040	63,440
Peanuts for nuts	Lb.	180	2,525	454,500	109,080
Soybeans for beans	Bu.	1,450	19	27,550	220,400

1/ Production in 480 pound net weight bales. 2/ Cottonseed would add $10,787,000 to the value of production from the cotton crop.

LIVESTOCK REVIEW

1983

Robert L. Jefferson

Cattle Numbers Down 2 Percent: All cattle and calves in Alabama as of January 1, 1984, totaled 1,870,000 head. This is 2 percent below the January 1, inventory last year and 4 percent below January 1, 1982, inventory. All inventory classes were down from a year ago except steers, other heifers 500 pounds or heavier, and calves under 500 pounds. All cows that have calved, at 935,000 head, were down 6 percent. Beef cows decreased 52,000 head, while milk cows were down 3,000 head. Heifers for beef cow replacement were down 2,000 head, while milk cow replacements declined 1,000 head. Other heifers were up 1,000 head from the previous year. Steers 500 pounds and over increased 12 percent and calves under 500 pounds rose 1 percent. The 1983 calf crop was placed at 870,000 head, down 3 percent from 1982. Alabama ranked 24th among states in all cattle, but 16th in the number of beef cows on farms.

Hogs: Alabama's December 1, 1983 hog and pig inventory was at a record low 440,000 head, 40,000 less than the previous low established in 1982. Breeding stock dropped to 75,000 head, compared to 78,000 head in 1982, while market hogs dropped 9 percent to 365,000 head. The 1983 pig crop totaled 777,000 head, down 1 percent from 1982. Pork producers farrowed 103,000 sows during 1983, down 6 percent from the previous year. Alabama ranked 20th among states in total hog numbers.

Milk Production Down: Alabama's dairymen produced an estimated 573 million pounds of milk during 1983, off 1 percent from the 580 million pounds during 1982. The annual average number of cows milked was 53,000 head, 6,000 below the 1982 average. Production per cow averaged 10,811 pounds for 1983.

Red Meat Production: The 1983 production of red meat (beef, veal, pork, and mutton) in Alabama totaled 254.3 million pounds (dress weight). This was 7 percent more than the 1982 level. Cattle slaughter totaled 253,700 head, 18 percent above a year earlier. Calf slaughter totaled 3,800 head, 1,300 head less than the previous year. Hogs buthered, at 525,200 head, were down 4 percent.

POULTRY REVIEW

1983

James G. Hand

Broiler Production Up 3 Percent: Alabama broiler producers marketed 515.7 million birds in the 1983 marketing Hear,an increase of 15.5 million from the 500.2 million marketed in 1982. This was only 3.6 million less than the record 519.2 million marketed in 1981. Alabama is the third largest broiler-producing state in the U.S.

Egg Production Down 2 Percent: During 1983, Alabama's laying flocks produced 2,813 million eggs, down 66 million from the previous year. Hens and pullets of laying age on hand as of December 1, 1983 was 11.8 million, compared with 12.1 million in 1982. Alabama ranked ninth nationally in the production of eggs.

Hatchery Production Up 2 Percent: Commercial hatcheries in Alabama hatched a record 643.8 million chicks in 1983, 15.3 million more than the previous high of 628.5 million chicks hatched in 1982. Egg-type chicks hatched was 9.9 million, compared with 10.4 million in 1982. Broiler-type chicks hatched totaled 633.9 million, 15.8 million more than in 1982. Broiler-type chicks hatched accounted for over 98 percent of the total hatch in the state. Alabama hatcheries shipped 76.3 million broiler-type chicks to other states in 1983, while 10.7 million were shipped into Alabama.

Chicken Production (excluding broilers) Up 12 Percent: Alabama poultrymen produced 13.9 million chicks (excluding broilers) in 1983, compared with 12.5 million in 1982. This phase of the poultry industry largely reflects the production of replacement pullets for laying flocks and production in small farm flocks.

1/ December 1, preceding year to November 30, current year (excluding broilers). 2/ Chickens sold plus home consumption plus or minus change in inventory.

PRICES REVIEW

1983

FORESTINE HERRON

Prices Received by Farmers: The All Commodity Index of Prices Received by Alabama farmers averaged 541 percent of the 1910-14=100 base in 1983, compared with 517 in 1982. This was a increase of 5 percent from 1982 and a decrease of 2 percent from 1981. Contributing most to the increase were higher livestock prices for cattle, calves, broilers and eggs and higher crop prices for soybeans and cotton.

The Livestock and Products Index, one of the components of the All Commodity Index, was 526 percent of the base in 1983, up 4 percent from the 1982 average. Beef cattle averaged $47.00 per cwt., up 70.0 cents from the 1982 price of $46.30. The average price of calves was $57.00 per cwt., $2.00 above a year ago. Broilers, at 27.5 cents per pound, were 2.5 cents higher than the previous year. Egg prices at 58.6 cents per dozen, were 2.2 cents above the previous year. Milk sold wholesale by farmers averaged $14.90 per cwt. in 1983, up 30.0 cents from a year earlier. Hogs, at $47.10 per cwt., decreased $5.80 from 1982.

The Crops Index, the other component of the All Commodity Index, was 572 percent of the base in 1983, up 5 percent from the 1982 average. Soybeans averaged $7.85 per bushel, up $2.49 cents from the 1982 price of $5.36. The price of corn averaged $3.65 per bushel, up 95.0 cents from a year ago. Wheat, at $3.25 per bushel, increased 25.0 cents from a year earlier. Potatoes, at $7.15 per cwt., dropped $1.65 from previous years. Peanuts averaged 24.0 cents per pound, 0.7 cent less than the previous year's average of 24.7 cents per pound. The price of cotton, at 65.7 cents per pound, increased 7.2 cents from the 1982 average.

Prices Paid by Farmers: Alabama does not have an Index of Prices Paid by Farmers. Therefore direct comparison between prices paid and those received by Alabama Farmers cannot be made. However, the cost of production items increased from the previous year.

Farmers in the state paid an average of $221.00 per ton for chick starter in 1983 compared with $207.00 in 1982 and $227.00 in 1981. Broiler grower sold for $224.00 per ton in 1983, compared with $216.00 per ton in 1982, $232.00 per ton in 1981.

Laying feed sold for $206.00 per ton in 1983, compared with $192.00 in 1982 and $217.00 in 1981. Soybean meal, 44 percent protein, at $14.25 per cwt., increased 75.0 cents from $13.50 paid in 1982. Hog feed, 14-18 percent protein, sold for $11.60 per cwt. during 1983, up 90.0 cents from 10.70 in 1982.

CASH RECEIPTS REVIEW

1983

Joyce B. McIntyre

Cash Farm Income: Total cash farm income from farm marketings for 1983 decreased 6.6 percent from $2,160,351,000 in 1982 to $2,017,885,000. Livestock and livestock products, valued at $1,258.5 million, accounted for 62 percent of the total, while crops totaled $759.4 million to make up the remaining 38 percent.

Alabama poultry and poultry products accounted for 36.8 percent of the state's total receipts from farm marketings with cattle and calves ranking second with 16.9 percent of the total receipts. Soybeans accounted for 9.2 percent of the total, while peanut receipts totaled 5.6. Farm forest products receipts accounted for 4.7 percent of the total followed by greenhouse and nursery products with 4.5, dairy products with 4.2 and hogs with 4.0 percent. Sales from these eight enterprises made up 85.9 percent of the total cash receipts from farm marketings in Alabama.

Receipts from the state's broilers, eggs, and farm chickens totaled $742.1 million in 1983, up $70.0 million from the 1982 total of $672.0 million. Cattle and calf returns totaled $341.9 million, down 2.6 percent from the 1982 total of $351.1 million.

Receipts from soybeans, peanuts, and forest products accounted for 52.0 percent of the total crop receipts. Combined returns from these crops were down 18 percent from 1982.

Farm Income Concepts: Cash receipts from farm marketings represent gross income from the sales of crops, livestock, and poultry during the calendar year. The value of home consumption of farm products, inter-farm sales of livestock, and crops fed on farms where grown are not included as cash receipts. Production expenses such as feed, fuel, fertilizer, and marketing costs are not dealt with when referring to gross cash receipts. County estimates of cash receipts reflect farm productivity of the county to which the production is assigned. For example, income from crops is credited to the producing county even though the crops may be stored, processed, and marketed in another county.

Cash receipts from marketings of crops is the final product of several estimates: acreage, yield, percentage of total production sold, average price, and changes in inventories. However, cash receipts should not be compared to value of production for such crops as corn, hay, cotton, and soybeans because portions of these crops are sold the next calendar year. Calendar year cash receipts from such crops represents sales of parts of production from two or more crop years. For crops such as peanuts, cash receipts is essentially the same as the value of production since the crop is all or nearly all harvested and marketed within a single calendar year.

The annual cash receipts from farm marketings of livestock and poultry also refers to the calendar year. Receipts include the sales value of an animal only once, usually the calf at the time it is sold for slaughter or final disposition. These receipts do not represent the summation of all income received from livestock and poultry producers in a given county. For example, feeder pigs or cattle sold from one farm to another within a county are included only upon final disposition. Also, when commodities such as broilers are produced under contract, the grower may directly receive only a contract payment. However, these data include the full value at the farm level of the broilers sold.

Cash Receipts Tables: In the following county tables, "Other Crops" includes cash receipts from all vegetables, other fruits, sorghum, oats, and other minor commodities. Greenhouse and nursery, peaches, pecans and peanuts are included under "Greenhouse, Peaches, and Nuts."
